## **Call for Research Projects**

### **“From Knowledge to Wisdom”**

Association for Sustainable Education, Research and Science kindly invites researchers and practitioners to submit proposal projects in area of web technologies with the scope to develop largest bibliographic database dedicated to scholars, researchers, practitioners, available on the Internet by browsed or searched. In this regard, association seeks large projects presented as business plan, taking in consideration the following main features of databases:

#### **Main features of ASERS Database:**

- possibilities for selection, multiple and refined search by keywords, title or author and also different classifications on JEL, AMS, ... etc;
- multiple opportunities for selection and combination of words using Boolean operators;
- possibility to restrain the search depending on the date of article occurrence;
- the full text access for journals and books will be marked separately and are therefore they will allow easy selection and viewing;
- for the journals with full text access restricted and for those to which the database does not offer access within in the subscription a preview of the articles' abstracts will be available;
- full-text files in .pdf format, a format that academia is accustomed;
- allows searches by keyword and the possibility of further suggesting for the new articles entered in the database;
- online access to journals concomitant with their appearance in printing format, sometimes overcoming their appearance in traditional format.
